Requirements Traceability Matrix

Data Quality Field Highlighting

Portfolio sample by Sarwat Farabee. Based on a real funded development project; client and product details have been generalized.

This matrix links each requirement in the Business Requirements Document to its user story and the test cases in the Test Plan, showing that every requirement is covered by testing.

Req ID	Requirement	Priority	User story	Test cases
FR-01	Rules defined with formulas, per industry template	High	US-03	TC-01
FR-02	Mandatory or desired type; configurable colors	High	US-03	TC-01, TC-09
FR-03	Rule fails when its formula returns true	High	US-03	TC-03, TC-04, TC-05
FR-04	Admin selects which fields a rule highlights	High	US-03	TC-06, TC-07
FR-05	Rule description used as tooltip text	High	US-03	TC-01, TC-10
FR-06	Check runs only when the user presses the button	High	US-01	TC-08
FR-07	Halo highlight; different colors by type	High	US-01	TC-09
FR-08	Tooltip shown on hover	High	US-01	TC-10
FR-09	Re-run the check to clear fixed highlights	High	US-01	TC-11
FR-10	API checks a single customer	Medium	US-02	TC-14, TC-15, TC-16, TC-17, TC-18
FR-11	API returns Blocked, Warning, or Passed, plus failed rules	Medium	US-02	TC-14, TC-15, TC-16, TC-17
FR-12	Failed rules do not block saving or progressing	High	US-01	TC-13
FR-13	No highlights or message when all rules pass	Medium	US-01	TC-12
FR-14	Parser rejects invalid formulas	High	US-03	TC-02
Regression	Existing functionality unaffected (Chrome, Edge)	-	-	TC-19

Coverage summary

- 14 of 14 functional requirements are linked to at least one user story and one test case.
- 19 test cases in total: 18 mapped to requirements and 1 regression case.
- User stories: US-01 (end user), US-02 (approver), US-03 (administrator).
